Specification with guidance at the project level for quantification and reporting of greenhouse gas emissions and removals

CUCG has executed a methodology validation assessment on methodology "Carbon Credits Methodology version 1.1" against ISO 14064-2. We have come to the conclusion that this methodology and the developed software is suitable to support the validation and verification of emission reduction projects in line with ISO 14064-3.

The level of assurance has been determined as limited.
